PESO EMPLOYMENT INFORMATION SYSTEM

TOP 20 OCCUPATIONS (BY WORK EXPERIENCE)

(as of 13 July 2018, 02:59 PM)

Through the **National Skills Registration Program (NSRP)**, the Public Employment Service Offices (PESOs) profile the available skills in every locality across the country. This hastens the provision of employment-facilitation services, i.e. labor market information, career guidance and employment coaching; livelihood and entrepreneurship assistance; and job referral and placement.

TIPS TO BECOME AN HTML DEVELOPER

(https://blog.philjobnet.gov.ph/2018/07/03/career-advice-html-developer/?et_fb=1)

There are lots of jobs related to the Web, so having the skills of an HTML Developer is an edge. Hypertext Markup Language or HTML is an effective way to build websites and web pages. This is why it is advisable that you also learn CSS and JavaScript. Learning Python and/or PHP is also essential in order to make web pages more interactive.

The following are tips on how you can become an HTML Developer:

- Learn HTML, CSS, Java, PHP, Python and other programming languages.** If you really want to learn the smart way, this could help you build a strong foundation in the field of programming.
- Apply what you have learned.** Knowledge is power, but knowledge without action is useless. Make sure that what you have learned is done through practice. This will solidify whatever theory you have learned.
- Create a special project.** If you have the budget to create your own website, blog or a single web page, showcase your skills in this.
- Make a portfolio.** This could be posted online where you could feature your special projects. This will be useful when you start looking for a job as this will serve as a reference for your future employers. This will give them a good picture of your character as an employee.
- Be an apprentice or have an OJT.** Make sure to have both eyes and ears opened if you have been accepted as an apprentice or On-the-Job trainee. Filter the good things and all the bad things behind.
- Try freelancing.** Do this if you haven't landed a job yet but have already created/ in the process of creating your own site. You may go to sites like Upwork to give it a try.
- Apply for the job!** The projects you have been involved in may have prepared you to become an effective HTML developer. If you already have sufficient knowledge and experience, you may want to start sending resumes to a few companies.
